SUSTAINABLE DESIGNS FROM GURAL, ENVIRONMENTAL DESIGN FOR NARROW AREAS

The driving force of environmentally conscious sustainable design is undoubtedly global warming and climate change. In our world, which is struggling with problems related to global warming and climate change, if everything we use today was designed correctly, many terms such as waste, famine, pollution, and thirst would never exist in our lives.

Good design allows for abundance, endless use and pleasure.

Gural Vit, which carries the responsibility for the future generations while meeting the needs of today, added a new one to its Sustainable Designs; FRUGALE

Frugale; An innovative design that allows the reuse of waste water while offering new generation solutions to the global threat of thirst. GÜRAL SENSE Gömme Rezervuar Sistemi ile klozet temizliğini yapmanız için gereken tek şey, akrilik olan panele elinizi yaklaştırmanız. Boşaltma komutunu alan rezervuar, panel yüzeyinden verdiği led ışık ile rezervuarın boşaltma sistemini harekete geçirir. 3 lt su boşaltırken yeşil, 6 lt su boşaltırken ise kırmızı ışık vererek işlemi gerçekleştirir. Fotoselli gömme rezervuar sisteminde enerji tüketimi fazla olduğu için, rezervuar mutlaka elektrik sisteminden beslenmektedir. Bu da rezervuara elektrik tesisatı çekmek gibi önemli bir işlem yapılmasını gerektirmektedir. Elektrik kesildiğinde ise kirlı bir banyo ile karşı karşıya kalmak kaçınılmazdır.

The only thing that you need to do is holding your hand during 2 second just 2 cm far away from control plate. Concealed cistern which perceives flushing comments has start by lighting. When it flushes 3 liter, it gives green light and when it flushes 6 liter, it gives red light. One of the most important distinctive characteristic of this product is easy assembly when you compare with devices which have photocell. Mentioned devices have more consumption then GÜRAL SENSE's technologies they need to be fed with electricity cable for using. But GÜRAL SENSE works only 4 batteries.

02

GÜRAL SENSE sistemi ise enerjisini elektrik tesisatına gerek kalmadan, panel içerisine yerleştirilen pillerden almaktadır. Sistem, aynı pil ile 100.000 kez kusursuz hizmet verecek şekilde tasarlanmıştır. Pillerin kullanım süresi dolduğunda, panel içerisinden pil uyarısını gördüğünüzde yeni pillerinizi takar ve yine 100.000 sefer daha kusursuz kullanım rahatlığını yaşamaya başlarsınız.

GÜRAL SENSE is designed to work 100.000 cycles with 4 batteries. This perfect performance makes it preferable. When the battery warning light has appeared, the batteries must be changed for using of another 100.000 cycles.

03

Sistemin bir başka avantajı ise akrilik panel sayesinde, sağlamlık, renk ve desen seçenekleri sunmasıdır. Banyolar için hiç olmadığı kadar çok zengin panel seçeneği sunan GÜRAL SENSE, farklılık arayışındaki tüm mimarlara önemli avantajlar sağlamaktadır.

Another advantage of this system is acrylic panel which makes it durable and reliable. The different designs can be also printed on acrylic panel according to preference. With this privilege GÜRAL SENSE provides lots of advantages for architects who look for variety.
